Bio

I am a front end web developer and a professional jazz pianist. I am always enthusiastic about taking on new challenges and finding ways to grow as a developer and a human. When I'm not coding, you can find me at the piano, exploring world cuisines and traveling to new places.

Front End Skills

HTML

Photoshop

Node.js

Experience

Front End Developer & Project Manager, Xaxis

2017 - Present

-Responsible for planning, designing, and developing programmatic advertising campaigns that serve hundreds of tailor-made creative variations, triggered by custom data signals and triggers

-Managed campaign teams made up of designers and developers and acted as a bridge between AdLabs and Account teams

-Used Adobe After Effects and other software partners to develop our Dynamic Video unit, an innovative offering that drastically cuts video production time and cost by using information from a database and generating countless variations at once

Piano Teacher, Mobile Music NYC

-Taught private piano lessons to students of all ages, specialized in young beginners

-Incorporated current pop music and favorite artists of students as a vehicle to teach foundational music theory

-Worked with parents of young students to outline short-term and long-term goals, practice schedules, assignments, etc
