Profile

I am a full-stack web developer and a professional jazz pianist. I am always enthusiastic about taking on new challenges and finding ways to grow as a developer and a human. Helping people through technology is a passion of mine and motivates me to do my best. I love interacting with a team and adapting to new situations so that everything runs smoothly. When I'm not coding, you can find me at the piano, exploring world cuisines and traveling to new places.

Technical Skills

JavaScript
Ruby on Rails
React/React Native
SQL
Node.js
Bootstrap

Experience

Freelance Web Developer

2018

- Works with clients to create custom, tailor-made products that streamline user experience and increase company productivity
- Offers technical support and quality assurance to optimize usability

Projects

War - The Card Game

- Used JavaScript to construct, shuffle, and deal a deck to create an original version of this classic card game

IdenTreefier

- Created a webapp that lets users view sidewalk trees in any NYC neighborhood and details about their breed, condition and address.
- Used JavaScript, PSQl, and Express, along with the Google Maps API.

Recordnition

- Created an Android app where users can get album info and suggested retail price by simply taking a picture of an album cover.
- Built in React Native, using Google's Vision API to send artist and record name to return details from the Discogs API

Piano Teacher, Mobile Music NYC

2016-Present

- Teaches private piano lessons to students of all ages, specializing in young beginners
- Incorporates current pop music and favorite artists of students as a vehicle to teach foundational music theory.
- Works with parents of young students to outline short-term and long-term goals, practice schedules, assignments, etc

Scheduling Manager, Brooklyn Bark

2016-2018

- Was responsible for managing and overseeing daily schedules for 30 Care Associates
- Maintained and updates behavioral and medical records for pets, as well as customer profiles in order to provide the best service possible
